Technology is shaping the future of underwriting

Insurer of the future

The future of insurance is not only exciting, but also transformative. Emerging technologies such as robotic process automation (RPA), artificial intelligence (AI), and advanced analytics are enabling insurers to:

- Remove manual underwriting and pricing activities
- Improve underwriting predictability and profitability
- Provide greater service and transparency to brokers and customers

In this video we look at how automation in underwriting can help insurers streamline policy creation and servicing, minimize manual errors, and reduce time to market.

The future of underwriting will be enabled by:

- Third-party and alternative data
- Analytics & Cognitive technologies
- Digital technology and the Internet of Things
- Robotics

See how technologies can help insurers better evaluate risks, and tailor products to meet changing customer demands. By embracing digital technologies, underwriters can offload administrative tasks, and focus on strategic, complex risks where expert advice is needed.

Watch this video to see how technology can help transform underwriting and prepare your organization for the future.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited ("DTTL"), its global network of member firms, and their related entities (collectively, the "Deloitte organization"). DTTL (also referred to as "Deloitte Global") and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.
